# M1C2 UI/UX Assignment

Task One: Referencing this image, create a low-fidelity wireframe.

Task Two: In the website https://sebkay.com, I can identify these colors:

- color: #191a1d;
- color: #5e5e5e;
- color: #333;

Task Three: Create a user story by referencing one of these websites

- Twitter https://twitter.com/home?lang=en
- Youtube https://www.youtube.com/
- Facebook https://www.facebook.com/
- Google https://www.google.com/

Task Four: Identify the prime objective of Facebook, Twitter, Google, and Youtube.

- Facebook: connects friends and users with common topics in groups. You can post photos, your day to day life or send private messages.
- Twitter: You can express yourself in quick posts called tweets. Images or videos can also be added. In my opinion, twitter can me more public than facebook.
- Google: the main search engine on the entire internet. Can be used to search any information, images… it has it's own mail platform, maps, calendar, notes app… the greatest online suite.
- Youtube: this tool is owned by Google, and its primary objective is to let us upload or watch videos.
